

Newport Pedestrian and Biker Count October 18 and 19, 2010

River West Neighborhood Assoc. Volunteers with orange city worker vests counted bikers and pedestrians crossing the intersections along Newport Ave from 9th St. to College Way.

11 Volunteers: Cheryl Buck, Alan Godsey, Anne Goldner, Everett & Bill Kurtz, Denise and Jim Mahoney, Sally Russell, Susan Smith, Tom Stump and Sue Vordenberg

It was planned to count from 8 to 9, noon to 1pm and 4 to 5 pm. However, after the first day's experience, it was decided not to count on the second day from 8 to 9 am because the bike and pedestrian traffic was small. Volunteers counted during 3 time slots on the first day, but only the noon to 1pm time slot on the next day. The 4 to 5 time was busy with bikers and pedestrians, but could not find volunteers to count on the second day.

This was the first experience that volunteers had of counting biker and pedestrian activity on roundabouts (9th, 14th & College Way). Pedestrian and Biker activity in the roundabouts was, at times, difficult to predict and count.

Of special note is the intersection of College Way and Newport where there were bikers and walker who took a "short-cut" through the Chevron Station, never entering the intersection.

Count Data

East, West, North and South = number of bikers and walkers using that portion of the intersection. Bikers or walkers who turned at the intersection ARE COMBINED IN THE COUNT on this report. Data recorded in the table below is an inaccurate interpretation of the volunteers' markings. Accuracy of data is uncertain.
