

# Integrated Water Master Plan (iWSMP)

## COB WATER SYSTEM CORE PRINCIPLES

1. Maintain City control
2. Maintain dual source supply
3. Maximize existing assets
4. Minimize energy consumption
5. Minimize cost (capital, O&M) of supply
6. Maintain current water aesthetics
7. Meet regulatory requirements
8. Provide flexibility for the future
9. Achieve environmentally sound projects
10. Maximize potential for renewable energy
11. Maintain ability to provide community safety (serve peak during power outage, fire, etc.)

*\*These Core Principles were included in Chapter 2 of the 2009 City of Bend Water Supply Alternatives Study prepared by Brown & Caldwell.*
